

Senior software developer focused on web applications and front-end. With over a decade of experience in the software development I got what's and why's of well maintainable codebases, yet I'm still flexible enough to question and improve any knowledge & tech which is changing faster than me.

I love great UI and smooth user experiences, and I'm passionate about custom data visualization beyond basic charts. Experimenting with AI, yet still loving the craft of making software all alone.

Work

SmartHead s. r. o. 2025 B2B	analysis and development of ESG reporting platform
SuperScale s. r. o. 2023 - 2025	analysis and development of internal portal & charting library
ERNI (Slovakia) s.r.o. 2019 - 2022	analysis and development of Web-Apps, UI design
Slovak National Gallery 2019 - 2020	development of webumenia.sk and occasional micro pages
AI Maps s.r.o. 2016 - 2018	analysis and development of web-apps, UX analysis

...older positions and personal projects are present in my [online portfolio](#)

Education

Faculty of Mathematics, Physics and Informatics

Comenius University Bratislava

2008 - 2010: Mathematics - Computer Graphics and Geometry (**Mgr.**)

2005 - 2008: Applied Informatics (**Bc.**)

Work

SmartHead s.r.o.

Angular Developer

- Built and extended reporting features for an ESG reporting platform, including charts, PDF export, DOCX export, and XLS import/export.
- Refactored nested ReactiveForms using signals and improved data model/interface design to simplify bindings and reduce bugs.
- Delivered frontend-only functionality for report generation and data handling within the Angular application.

SuperScale (Slovakia) s.r.o.

Front-End / Angular Developer

- Developed an internal portal and custom charting library based on D3.js for an ELT platform used for data management and dashboards.
- Built interactive dashboard components and custom visualizations for pipeline and data transformation workflows.
- Worked on frontend features supporting custom pipelines and data aggregation across multiple sources.

ERNI (Slovakia) s.r.o.

Angular Developer / UI Designer

- Built Angular-based web application features for laboratory device management in an Electron environment.
- Developed custom visualizations, including a ring-pie chart and a D3.js chart component, to match product look and feel.
- Created dynamic form components, experiment result export flows, and an internal components library for reuse across client projects.

AI Maps s.r.o.

Angular Developer

- Developed web application features for car-park and ride-management systems.
- Supported scheduling, tracking, and management workflows for drivers, rides, expenses, and service activities.
- Contributed to multiple Angular-based application modules across two related systems.

Bonum s.r.o.

Full Stack Developer

- Built web applications and reporting features for manufacturing execution systems used in automotive contexts.
- Supported real-time monitoring, data collection from assembly lines, and custom reporting workflows.
- Improved report design and created utilities to speed up new car model mapping.
